

Barrycidal 30 plus - broad spectrum germicide

concentrate - 1000 ml bottle

Barrycidal 30 Plus is a non-toxic aqueous solution based on glutaraldehyde and phenolic compounds, indicated for the high-level disinfection of surgical instruments and heat-sensitive and non-autoclavable endoscopes.

It has good detergent properties and a good ability to dissolve blood and organic residues.

Colorless, non-toxic and non-irritating liquid emulsion.

Class II b Medical Device - Directive 93/42 EEC.

Spectrum of action: Broad spectrum disinfectant, with bactericidal action (EN 13727 and EN14561), fungicide (Candida Albicans, Aspergillus Niger; EN 13624 and EN 14562), mycobactericide and tuberculocide (Mycobacterium Avium, Mycobacterium Terrae; EN 14348 and EN14563) , virucidal (EN 14476).

The concentrated 30 Plus acts in 15 minutes when diluted at 5% and in 60 minutes when diluted at 2.5%.

Diluted at 2.5%, it produces 9 liters of ready-to-use product.

100 ml of solution contain:

- Glutaraldehyde (<2%)
- 2-benzyl-4-chlorophenol 4.5%
- 2-phenylphenol 7%
- Coformulants
- Purified water

Manual in GB, IT, FR, ES.

Available diluted or concentrated in bottles of different capacities.
