

## Optical glass macro cuvettes

### ml 3,5 h 45 mm

Cuvettes for spectrophotometry applications in the visible range.

Made of optical glass, they have a clear and sharp optical path with indication of the relative direction.

Available in macro, semi-micro and micro versions

With PTFE lid

External dimension: 12 x 12 x 45mm

Packaging: single

#### On request are available:

- Cuvettes with different optical path measurements
- Cuvettes of different sizes
- Special cuvettes for IR-fluorescence reading
- Cuvettes for flow measurements
- Cuvettes with round section cap
- Calibration standards for spectrophotometers
