

## Cuvette UV micro - central Height 8,5 mm

### in UV-polymer, disposable for spectrophotometer

In many fields, plastic disposable cuvettes for the UV/VIS range can replace expensive, sensitive glass or quartz cuvettes.

Time-consuming expensive cleaning processes are eliminated, and the dangers of sample mixing and contamination are reduced to a minimum.

- Usable for wavelengths from 230 nm, ideally suited for measurements at 260 nm, 280 nm and in the visible range.
- Standard 10 mm light path.
- Sample volumes as small as 70 µl are sufficient.
- Designed for the photometric determination of proteins, ssDNA, dsDNA, RNA and oligonucleotides

#### CERTIFIED LIFE SCIENCE QUALITY:

Virgin raw materials  
Manufactured under controlled room conditions  
Intensive in-process controls  
Visual inspections  
Batch management  
Final product inspection  
Proven functionality

Also available individually packaged, free of DNase, DNA and RNase

#### Accessories that can be purchased separately:

Caps for micro UV cuvettes

Code 53759240 100 pcs blue colour

- For a secure closure
- For sample storage down to -20°C
- Multiple colors for efficient sample management
- PE material
- Available in other colors on request
