

26x76 VIEW object slides

ground edges, 45° beveled corners - green side band

Specimen slides with side band with colored coating, allow maximum writing clarity and make the identification of the specimens safe (also by means of ink-jet or laser printers)

Made of soda-lime glass,

3rd hydrolytic class

Comply with ISO 8037/1

Colored marking area approx.20 mm (at one end, on one side only)

VIEW microscope slides feature a colored writing band available in seven colors: white, blue, pink, yellow, green, purple and orange.

Ciascun colore codifica a colpo d'occhio diversi esemplari: all'urgenza, alla tecnica di lavorazione o di colorazione, ad esempio.

Suitable for marking with inkjet and laser printers and permanent markers.

Autoclavable; pre-washed and ready to use (slides are cleaned thoroughly on automated machinery and they are ready for use)

Slides are also resistant to scratching or sticking when stacked together

Edges: ground at 90° with or without beveled corners at 45°

IVD-in vitro diagnostic device, according to IVD directive 98/79 / EC, with CE mark, with lot number and expiry date for complete information and traceability

Dimensions: 76 x 26 mm, thickness about 1 mm

Pack of 2500 pieces (50 packs of 50 pieces)
