

## Vacuum stop valves

Prevents water back-flow when pressure falls.

Useful for any tubing system and vacuum line.

Prevents water back-flow when pressure falls. Useful for any tubing system and vacuum line.

Maximum safe working pressure: 2 BAR (equal approx. 28.4 P.S.I.).

Minimum safe working pressure 0,07 BAR

at room temperature (20°C).

TESTED ACCORDING TO REACH REGULATION 1907/2006 ANNEX XVII.

### MATERIAL:

Valve: PP

Inner disk: DUTRAL

Code	Description	Nominal O.D. Ø mm	tapered conn. tubes Ø
03100418	Vacuum stop valves	8 / 9 / 10	7,8 / 10,0
03100419	Vacuum stop valves	12 / 13 / 15	9,5 / 12,5
