

Vacuum stop valves

Nominal External Ø 8-10

Prevents water back-flow when pressure falls.

Useful for any tubing system and vacuum line.

Prevents water back-flow when pressure falls. Useful for any tubing system and vacuum line.

Maximum safe working pressure: 2 BAR (equal approx. 28.4 P.S.I.).

Minimum safe working pressure 0,07 BAR

at room temperature (20°C).

TESTED ACCORDING TO REACH REGULATION 1907/2006 ANNEX XVII.

MATERIAL:

Valve: PP

Inner disk: DUTRAL
