

## Steristoppers cellulose caps no. 26

### For Diam. 26-27 mm

- are autoclavable up to 200°C
- are bacteria filtering
- are sterilizable
- are air permeable
- are saving time in the laboratory
- have a competitive price
- are designed for single use
- are available from 4-71 mm Ø

Steristoppers have proved as an excellent sealing for microbiological samples and tissue cultures in test tubes and Erlen-meyer flasks.

They are in constant use in many leading microbiological laboratories worldwide.

In order to select the best fitting size of Steristoppers only the internal diameter of the glasses will be relevant.

Glasses internal Ø of:  
26 - 27 mm
