

FFP2/V face mask with valve

FFP mask

- with **Cool Down** exhalation valve
- with colour-coded nosepiece and exhalation valve to immediate identification for the protection class
- protection against slightly toxic and harmful particles as well as unpleasant organic odours up to 12,5 times the NPF value
- activated charcoal layer included
- filter class DIN EN 149:2001 FFP2 NR & (EU) 2016/425
- in original packaging: 4 years shelf life
- **12 pieces per pack**

With paint coded nose clip respective exhalation valve to identify the protection class.

Filtering half masks stand out owing to their low weight, innovative preformed construction, low breathing resistance and high level of comfort as well as the availability of a Cool Down exhalation valve.

The innovative Cool Down Valve is an one-way valve that offers easy exhalation for avoiding heat accumulation within the faceblank.

The foam-lined nose area with flexible nose clip enables the mask to fit tightly yet comfortably on the skin.

In original packaging: up to 4 years shelf life.
